

KRUSHAY BHAVSAR

New York City Metropolitan Area | (201) 375-5770 | krushaybhavsar@gmail.com | U.S. Citizen
Portfolio: krushaybhavsar.com | LinkedIn: linkedin.com/in/krushaybhavsar | GitHub: github.com/krushaybhavsar

EDUCATION

Georgia Institute of Technology – GPA: 4.0/4.0, Faculty Honors **Atlanta, GA**
May 2026
B.S. in Computer Science / Concentration in Cybersecurity & Information Internetworks

- **Relevant Coursework:** Design & Analysis of Algorithms, Computer Organization & Programming, Data Structures & Algorithms, Discrete Mathematics, Objects and Design, Linear Algebra
- **Clubs and Activities:** GreyHat Cybersecurity Club, GT Experimental Rocketry, Trading Club at GT, Startup Exchange, Soccer

SKILLS

Programming/Markup Languages: TypeScript, JavaScript, Python, Java, SQL, R, MATLAB, C, C#, HTML, CSS, SCSS, XML
Frameworks/Libraries: React.js, React Native, Node.js, Express.js, Java Spring, Django, Flask, GraphQL, Redux, Pandas, NumPy
Tools: Docker, PostgreSQL, Amazon Web Services, PowerShell, Linux, Firebase, Git, Jira, Android Studio, Unity

EXPERIENCE

Vertice AI, Financial Technology Startup **Durham, NC**
Jun 2024 – Aug 2024
Associate Software Engineer Intern

- Developed an analytics solution using **Python, PostgreSQL, React.js, Express.js and AWS** technologies to assist credit unions in tracking growth/engagement and identifying marketing opportunities for specific members
- Automated the generation of transaction models by implementing a component-based system with vectorized full-text search to analyze member behaviors, resulting in a **40% reduction in code** volume and a **50% improvement in runtime** efficiency
- Devised predictive models to **efficiently analyze over \$5 billion** in member transactions, track spending trends, and categorize members for partnered credit unions to know, grow, and measure their overall membership

Jane Street Capital, Quantitative Trading Firm **New York, NY**
Jul 2023 – Aug 2023
Academy of Math and Programming Intern

- Designed and implemented algorithmic solutions to complex problems in **game theory, graph theory, and linguistics** using Python, enhancing skills in data analysis, decision-making under uncertainty, and quantitative trading strategies
- Achieved 7th place in Jane Street's Electronic Trading Challenge (ETC) by developing high-frequency trading algorithms in a competitive 6-hour trading session, resulting in one of the highest Profit-and-Loss (P&L) scores among 80+ participants
- Collaborated with International Math Olympians to complete intensive coursework in **combinatorics and number theory**

Cisco Systems, Technology Cooperation **New York, NY**
Jul 2022
Summer Extern

- Participated in a highly selective program (~10% out of 900+ applicants) to gain industry experience in **Cybersecurity and IoT**
- Formulated and presented innovative solutions for mass transit challenges using Cisco technologies such as Meraki MR56 Camera systems, LoRaWAN, and CyberVision, resulting in increased rail ridership and enhanced rider safety
- Achieved **NYC Extern of the Day** by excelling in workshops, shadowing company executives, and demonstrating leadership and technical skills in IoT, AI/ML, and Meraki Solutions, among various other networking technologies

Mentor Labs, Harvard Technology Startup (acquired) **Boston, MA**
Aug 2021 – Apr 2022
Senior Software Developer

- Developed a full-stack application using **Java Spring, PostgreSQL, React.js, Express.js, and AWS** services to assist thousands of high school students in the college admissions process via a virtual guidance counselor and summer program recommendations
- Implemented a matching algorithm for scholarship/summer programs and leveraged React.js to create a seamless UX on the landing page, dashboard, scholarships, and summer programs pages, resulting in a **25% increase in user retention**
- Contributed to a cross-functional development team while following the Agile Scrum methodology and establishing weekly team goals/timelines, leading to a **global user base of over 10,000 students** and incubation at the Harvard Innovation Labs

PROJECTS

Privalink <https://github.com/krushaybhavsar/privalink>
Aug 2024 – Present
React.js, TypeScript, Express.js, AWS (RDS, EC2, S3, Cognito), Cryptography

- Implemented a secure file encryption and transfer system using elliptic curve cryptography (ECC) to ensure the confidentiality of sensitive data, with private keys encrypted client-side for zero-knowledge security
- Developed customizable self-destructing links for file sharing, utilizing AWS infrastructure (S3, EC2, RDS) and cryptographic processes to enable secure, temporary access to encrypted files without exposing key information

Attitude Determination and Control System (ADCS), Mission Control Software Aug 2024 – Present
Docker, Embedded C, Python, SQLite, Grafana

- Implemented a Controller Area Network (CAN) Protocol using the STM32H7 hardware abstraction layer to ensure high-speed communication with flight systems as a core member of the Avionics Team at Georgia Tech Experimental Rocketry (GTXR) Club
- Developed low-latency backend systems integrated with Featherweight altimeters for real-time rocket telemetry analysis, along with a data visualization dashboard for Mission Control as part of the Ground Systems Team

CERTIFICATIONS & AWARDS

Certifications/Courses: Introduction to Cybersecurity (Cisco), Practical Introduction to Quantum-Safe Cryptography (IBM), Introduction to IoT (Cisco), Basics of Quantum Information (IBM), CodePath Advanced Technical Interview Prep
Honors/Awards: 1st Place SimpliHacks Hackathon (international), 1st Place High Tech Hacks Hackathon (international), 1st place Kiss Institute of Practical Robotics (KIPR) Botball Competition (national), Valedictorian of Secaucus High School
